Team Meeting

Meeting called by:	Jeremy Convocar	**Type of meeting:**	Online
Facilitator:	Thamarat Singcharoenchai	**Note taker:**	Aileen Ni
Timekeeper:	Aileen Ni		

Attendees: Aileen Ni, Jeremy Convocar, Thamarat Singcharoenchai

Please bring: Laptop

Minutes

Agenda item:	Brief review of our assigned roles for the presentation.	**Presenter:**	Aileen Ni
	Work on the introduction to cyberattacks in the Healthcare System, provide examples, and what topics to focus on		

Discussion:

We each went over our assigned roles, and what resources each person had found in relation to cyber security and the effects it had on health system in the past and up to the present. We compared our flow of work, what we decided to include in the slides, and the works cited page to support our ideas. Based on what we have, we focused on resources that give us details about healthcare security, and the downsides of their system in the past, specifically the phishing scams and the Anthem Data Breach. We gave remarks on what should be added/ subtracted to make the presentation flow better and we shared our resources so our group members can have more information needed to complete their initial stage of planning. In the next stage, we plan on adding resources on solutions to hacking and data breaches and steps to for prevention so that Anthem Data breach doesn't occur once again.

Conclusions:

Each person had contributed adequately to their slides and had suggested resources in the works cited links at the last slide. The discussion and remarks provided a significant insight on what should be done next and where to move forward in the slides, continuing with cyber-attacks in the healthcare system.

Action items	Person responsible	Deadline
✓ Went over works cited	All	
✓ Remarks on the slides so far	All	
✓ How to proceed based on the remarks	All	Next meeting
